DETAILED ACTION

The claims 1-39 are pending in the instant office action.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-2, drawn to method of detecting modification of protein expressed by a cell, especially O-sulfonation of serine or threonine residue, classified in class 435, subclass 15.

Group II. Claims 3-6, drawn to method of increasing or decreasing O-sulfonation of serine or threonine of protein expressed by a cell comprising steps of using inhibitor, classified in class 435, subclass 193.

Group III. Claims 3, 5, 7, drawn to method of increasing or decreasing O-sulfonation of serine or threonine residue of protein expressed by a cell comprising steps of derivatizing or substituting O-sulfonation of serine or threonine residue classified in class 435, subclass 193.

Group IV. Claims 3-5, 8, drawn to method of increasing or decreasing O-sulfonation of serine or threonine of protein expressed by a cell further comprises step of detecting O-sulfonation of serine or threonine of protein, classified in class 435, subclass 193.

Group V. Claim 10, drawn to antibody that binds O-sulfonated protein expressed by a cell. classified in class 530, subclass 7.

The inventions are distinct, each from the other because of the following reasons:

Inventions in groups I, II, III and group IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case these methods involve different step, use different subjects and result different outcomes.

Inventions in groups I-IV and group V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case these methods (groups I-IV) neither use nor produce the antibody of group V.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Art Unit: 1652

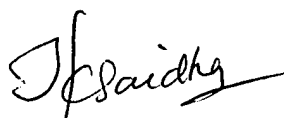

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammad Meah whose telephone number is 571-272-1261. The examiner can normally be reached on 8:30-5PM.
